

Group Number: 4 Leader: FEDILES, Irene Members: CAPACETE, Connor Caillou T. ALIZA, Anghela M. CASUCIAN, Jerome MAKAKUA, Maxine F. MIGUEL, Erin Maesel C. PERUCHO, Ralph Selwyn B. PLATIL, Jhon Rex V.	Title of the system: Cemetery Lot Information System (Whispering Pines Cemetery)
Period: Finals	Date: 1/14/2025

Member list and their contribution:

CAPACETE – Database and CustomerData, VacantList, and ReservationList pages.

ALIZA – Homepage, CustomerInformation, ServiceInquiry, CremationServices, CremationAddOn, IntermentScheduling, and PaymentSystem pages, Database, Final Compilation of the System

CASUCIAN - Database and CustomerData, VacantList, and ReservationList pages.

FEDILES – BurialServices, BurialAddOn, and IntermentScheduling pages.

MAKAKUA – BurialServices, BurialAddOn, and IntermentScheduling pages.

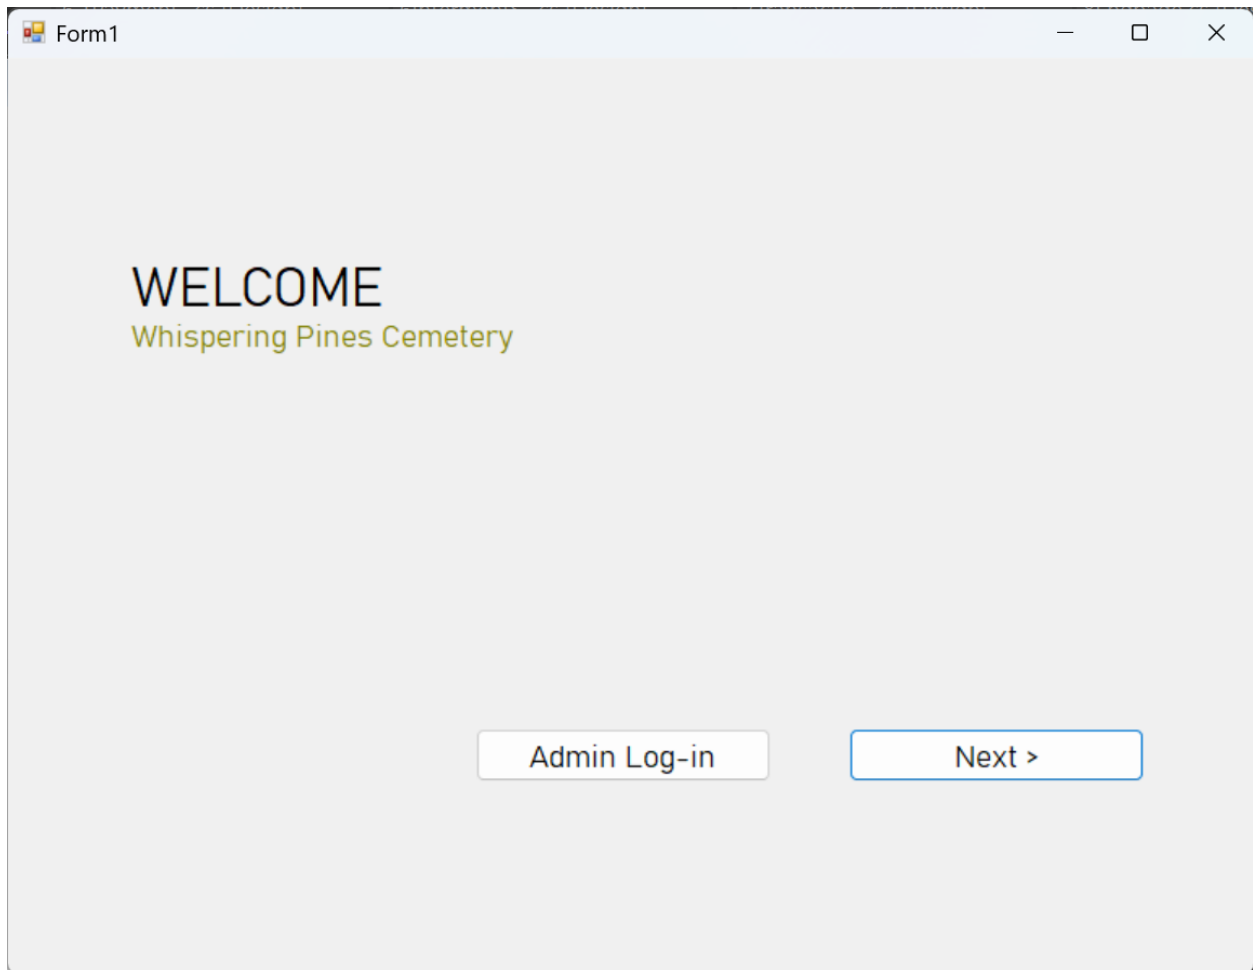

MIGUEL – CustomerInformation, TransactionInformation, and Endpage, Database, Progress Report

PERUCHO – AdminLogin, ForgotPassword, and AdminAccess pages.

PLATIL – AdminLogin, ForgotPassword, and AdminAccess pages.

Progress Report:

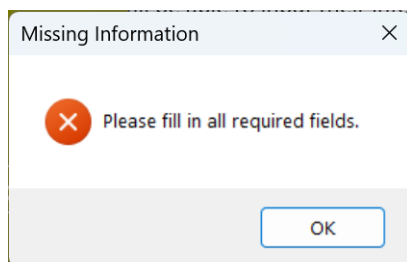

During the prelim period of this semester, we focused on the design and layout of the system before giving it proper function. For this period, we focused on coding the functionalities of the system and now, a good percentage of the system has functionality. However, the database we plan to create has not been created yet nor connected to the system itself, although some members were already assigned to handle the database for them to properly learn how to create and connect it to the system. We will be focusing on creating and connecting the database for the final stages of the system as well as applying proper naming conventions to the properties in the code. There might still be some changes to the final layout and design and even the functionality of the system.

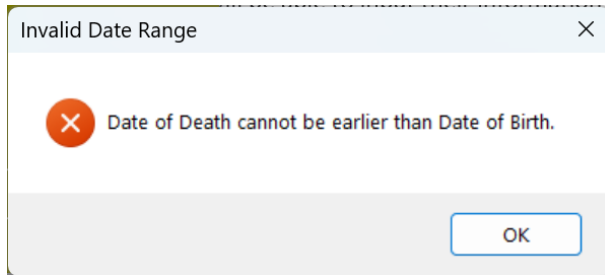

This is the Homepage of the system. Clicking the “Next” button will lead to the CustomerInformation page while the “Admin Log-in” page will lead to the AdminLogin page. Both buttons are clickable and will lead the users to the next sections.

The screenshot shows a web application window titled "CustomerInformation". The main heading is "Customer Information" with a back arrow icon. Below this is a section titled "Buyer/Applicant Details". This section contains several input fields: "Client Name" (split into "First Name" and "Surname"), "Relationship" (with a hint "eg. mother of the deceased"), "Email and contact info" (split into "Email Address" and "contact no." with a "+63" prefix), and "Active Address" (with a hint "House Number | Barangay | City / Municipality | Postal Code | Province"). Below this is a section titled "Deceased Details", which includes "Name" (split into "Name" and "Surname"), "Date of Birth", and "Date of Death", all with dropdown menus. A "Next >" button is located on a green sidebar to the right of the form.

This is the CustomerInformation page. Users will be able to input their information as well as the details of the deceased. The information is saved using setters and getters and will be saved in the database once properly implemented.

Clicking the "Next" button when one or more fields are left blank will pop up a warning message to inform users that they need to fill up all required fields.

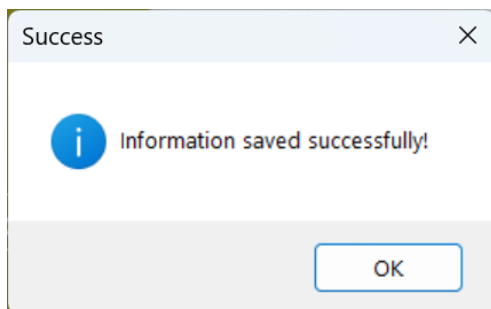

If the chosen Date of Death is earlier than the Date of Birth, a warning message will pop up to inform the user.

A screenshot of a web application window titled "CustomerInformation". The main heading is "< Customer Information". The form is divided into two main sections: "Buyer/Applicant Details" and "Deceased Details".

Under "Buyer/Applicant Details":
- "Client Name" is split into "First Name" (Erin) and "Surname" (Miquel).
- "Relationship" is "Sister" (with a note "eg. mother of the deceased").
- "Email and contact info" includes "Email Address" (erin@gmail.com) and "contact no." (+63 9274837643).
- "Active Address" is "Vermont Towers" (with a note "House Number | Barangay | City / Municipality | Postal Code | Province").

Under "Deceased Details":
- "Name" is split into "Name" (Nire) and "Surname" (Miquel).
- "Date of Birth" is a dropdown menu showing "Tuesday , November 11, 2025".
- "Date of Death" is a dropdown menu showing "Friday , November 14, 2025".

On the right side of the form, there is a large green vertical bar with the text "Next >" at the bottom.

Completing all fields will allow the user to successfully go to the next page without issue and will pop up a message to inform the user that the information was successfully saved.

In the BurialServices page, the users have the option to choose where in the cemetery the deceased will be buried. If the user already owns a lot, the "Ownership Confirmation" checkbox is checked, and they can find it in the system's records. The final price will be lessened since they already own a lot.

In the CremationServices page, the user is asked to submit the Cremation Permit of the deceased. Similarly to the BurialServices page, the users have the option to choose where in the cemetery to deceased's ashes will be placed. If the user already owns a lot, the "Ownership Confirmation" checkbox is checked, and they can find it in the system's records. The final price will be lessened since they already own a lot.

☐ I have thoroughly checked the details and can confirm that the information provided is correct*

Next >

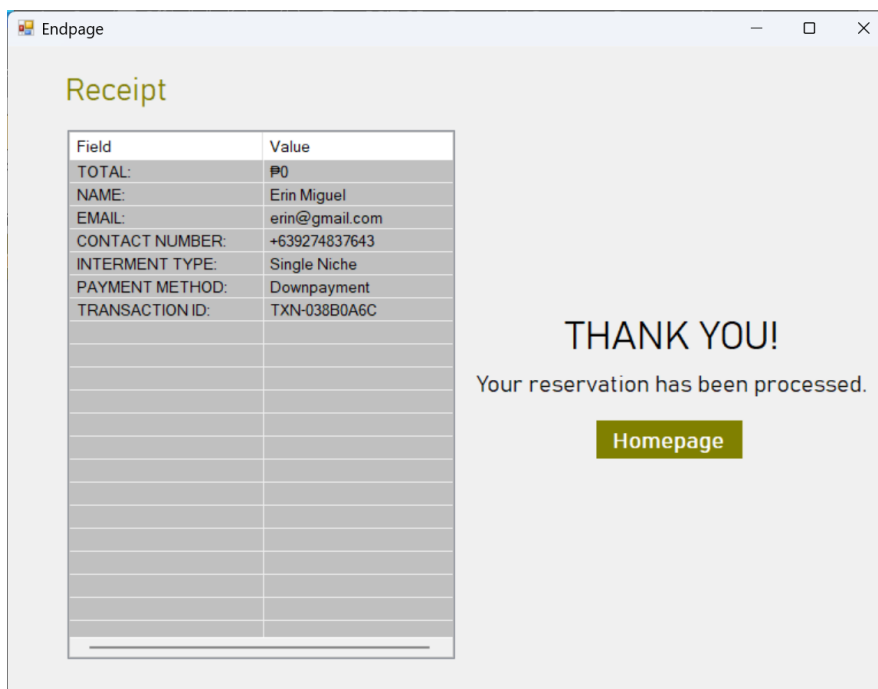

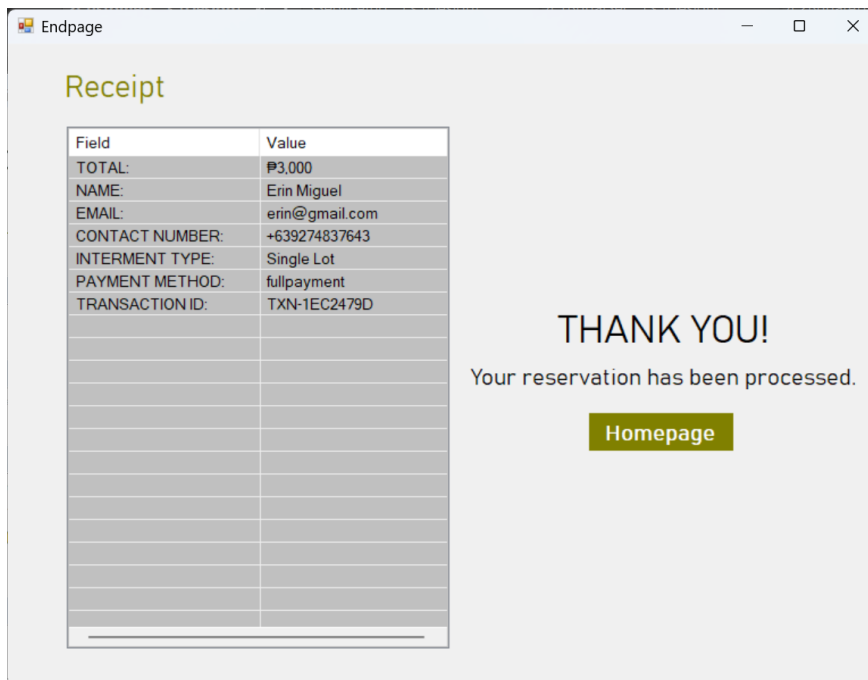

After the PaymentSystem page, the next page is the TransactionDetails page where important details are reflected based on the inputs of the user. This serves as a final checking for the user if their details are correct.

Confirmation Required

 Please confirm that all details are correct before proceeding.

OK

If the user clicks on the “Next” button when the checkbox, which indicates that their details are correct, is unchecked, then a warning message will pop up informing them to check the box first.

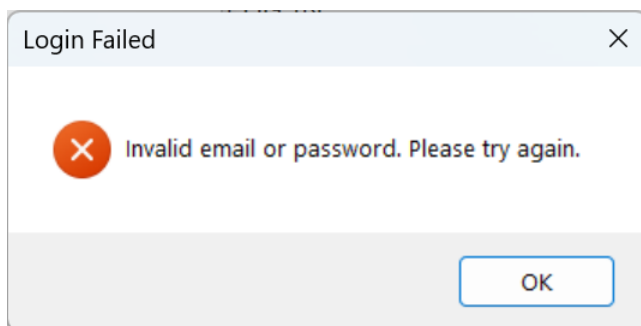

Once the checkbox in the TransactionDetails page is checked, clicking the "Next" button will redirect the users to the Endpage, which will show a receipt of their details as well as the randomized transaction ID. Clicking on the "Homepage" button will bring the users back to the Homepage.

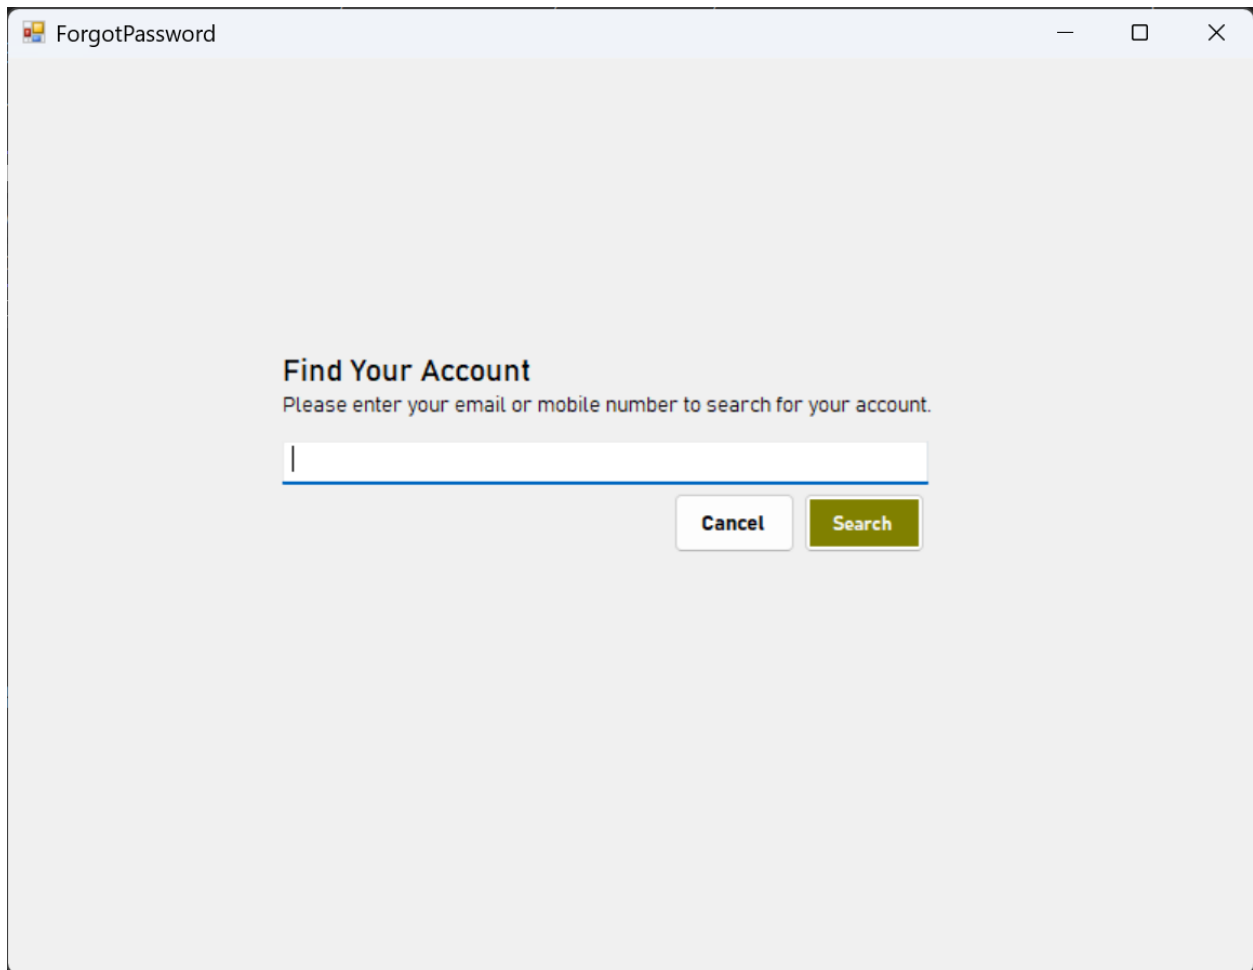

The image shows a web browser window titled "AdminLogin". In the top-left corner of the page content, there is a back arrow icon. The main heading in the center is "LOG IN". Below the heading, there is a white input field for email, followed by another white input field with the placeholder text "Enter your Password". Below the password field is a link that says "Forgot Password?". At the bottom center, there is a green button with the text "LOG IN".

The AdminLogin page is accessed when the user clicks on the “Admin Log-in” button found in the Homepage. The email and the password of the admin are asked before the admin can access the databases of the system.

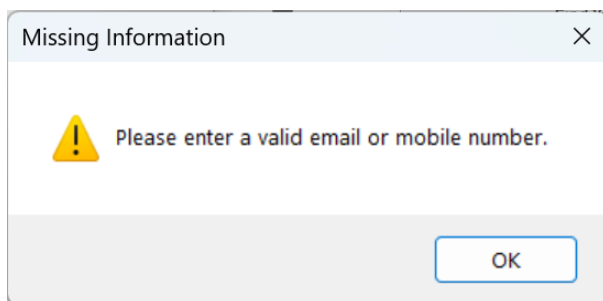

The image shows a small dialog box titled "Login Failed" with a close button (X) in the top-right corner. Inside the dialog, there is a red circular icon with a white 'X' on the left. To its right, the text reads "Invalid email or password. Please try again." At the bottom right of the dialog, there is a button labeled "OK".

If the email or password is wrong or the credentials do not match, a message will appear informing the admin to try again.

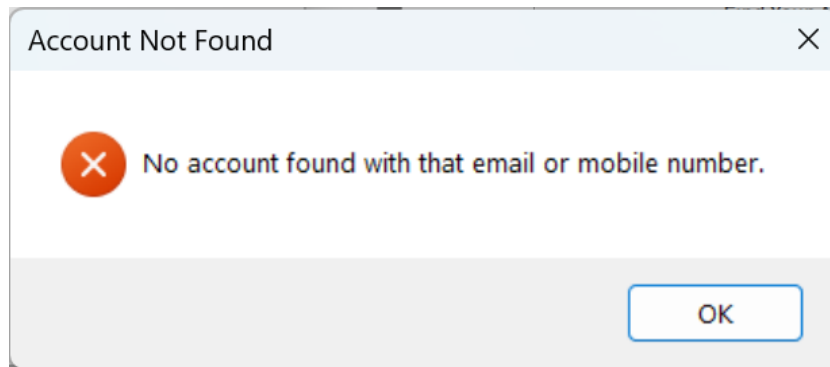

The screenshot shows a web application window titled "ForgotPassword". The window has a light gray background. In the center, there is a section titled "Find Your Account" in bold black text. Below this title, a subtitle reads "Please enter your email or mobile number to search for your account." Below the subtitle is a white text input field with a blue border. To the right of the input field are two buttons: a white "Cancel" button and a green "Search" button.

If the admin clicks on the “Forgot Password?” button on the AdminLogin page, they are redirected to the ForgotPassword page in which they are asked to enter their email / mobile number to find their account.

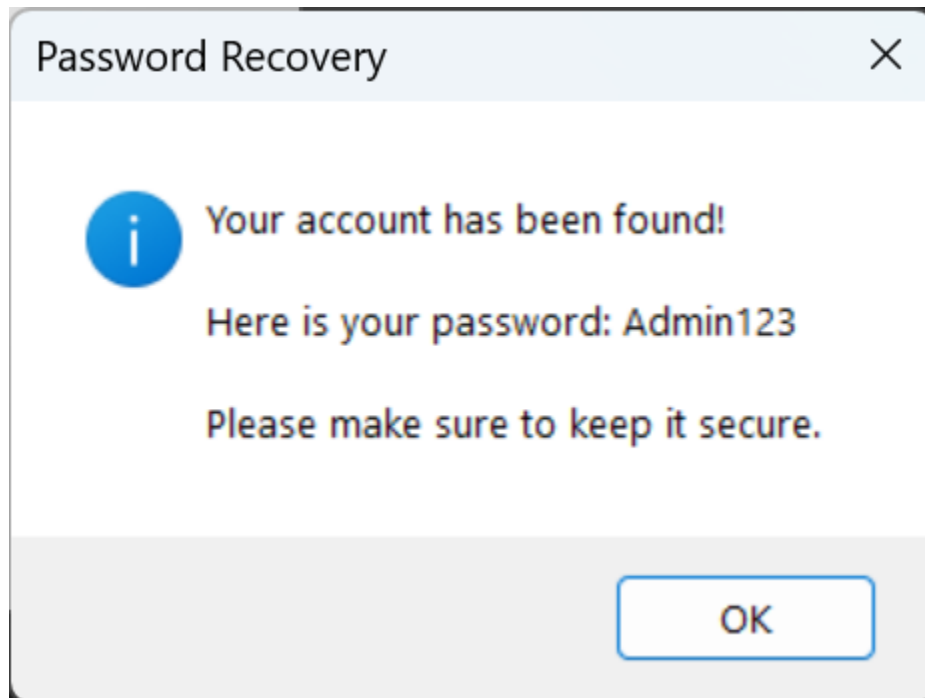

The screenshot shows a small dialog box titled "Missing Information" with a close button (X) in the top right corner. Inside the dialog, there is a yellow warning triangle icon followed by the text "Please enter a valid email or mobile number." At the bottom right of the dialog is an "OK" button.

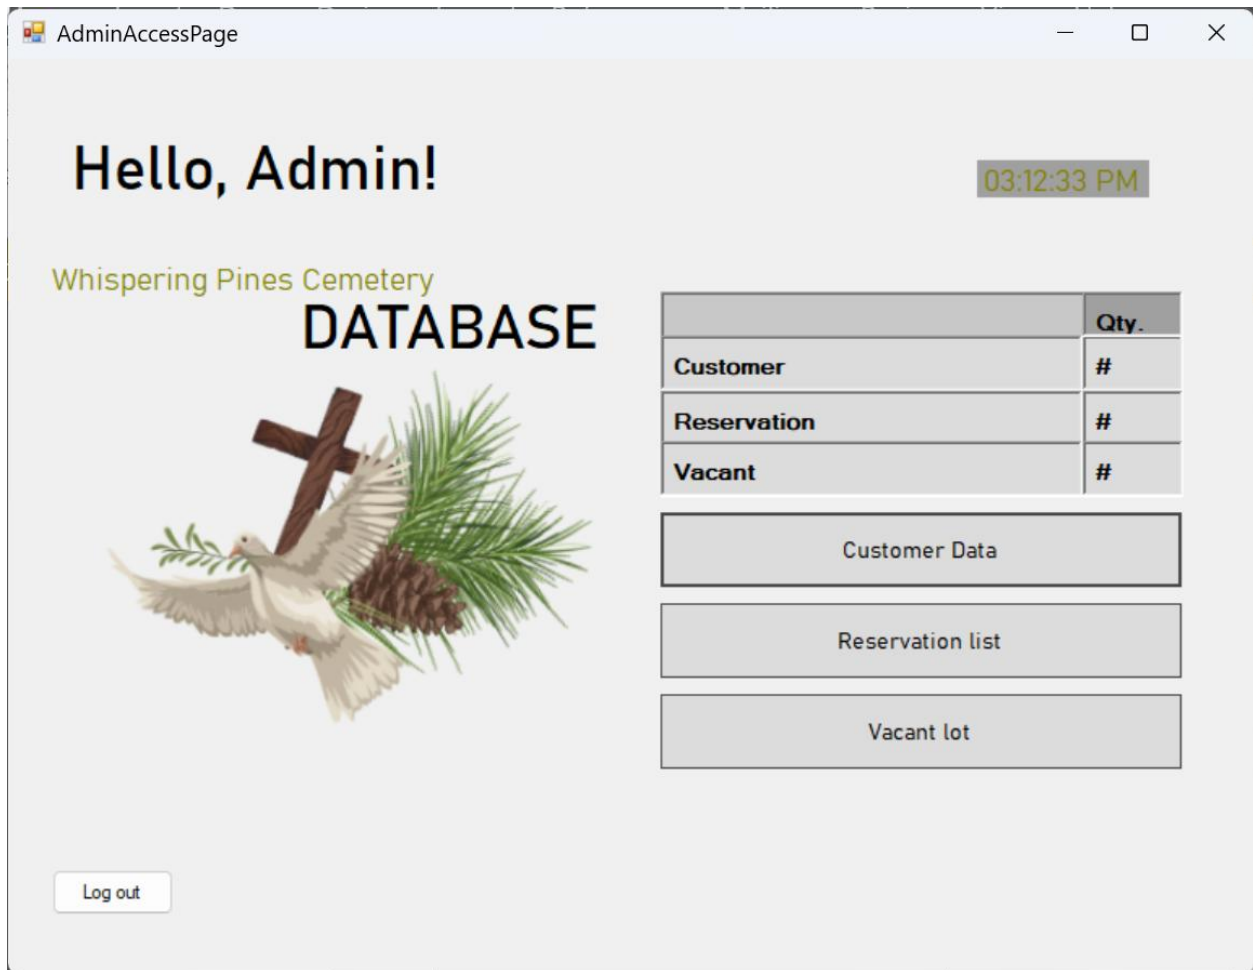

If a invalid number or email is entered or if the field is left blank, a warning message pops up.

If the entered email or number is not in the records of the system, a warning message will pop up.

If the entered email or number is found in the records of the system, a message will pop up and give the password. Clicking the "OK" button will automatically redirect the users to the AdminLogin page.

Once the admin has successfully logged in, they are redirected to the AdminAccessPage where they are able to click on the three buttons that will direct them to different parts of the database.

Currently, the CustomerData, ReservationList, and VacantLot pages do not have any functionality. In these pages, they will display different parts of the database. However, we are still in the process of finalizing these pages (combining the ReservationList and VacantLot, keeping only the CustomerData, etc.).
